

## 3D Ultrasound Centre

Medical Clinic

Operation licence No: 5045/2007

Unique identification No: 108001

**Hattyúház, 49. Batthyány str., Budapest,  
1015**

**Tel: 06-30/468-5255**

**Name: Bernadett Horváth**

Date of Birth: 10/01/1996

Address: 39. Tegzes str., Budapest, 1221

**Date: 16/06/2011**

### **Abdominal US:**

The liver is enlarged with mildly increased reflexion.

intrahepatic bile ducts have a mildly increased reflexion.

The Choledochus duct is 3,4 mm wide.

The gall bladder is moderately dilatated.

The structure of the pancreas is regular.

The size of the spleen is 87 x 49 mm.

The left kidney has regular structure with mildly dilatated pylon.

Small reflexion is visible in the parenchyma and the calyces of the right kidney.

The emptying of the stomach is slow.

The mucosa of the duodenum is heavier and there are small reflexions in its wall.

the jejunal fringes in the small intestine have a heavier mucosa. The ileac fringes have a mildly heavier mucosa with moderate mucus production.

The colon is filled and its mucosa is mildly heavier.

No visible enlarged lymph nodes along the big vessels.

Small amount of urine in the bladder.

### **Opinion: In comparison with previous examination:**

The small intestine's mucus production is significantly decreased.

The structure of the liver appears to have lighter reflexion.

Bile flow is improved.

**Check-up: advised in 3 months.**
